

Meteoric Cosmeceuticals

Next-Gen Cosmetic Genesis

The Science Behind the Glow

Meteoric Cosmeceuticals Pvt Ltd (A Meteoric Biopharmaceutical Group company) was founded with the vision of delivering cutting-edge, biotechnology-driven cosmetic ingredients to the global market. The cosmetics industry is experiencing a paradigm shift, fueled by advancements in biotechnology that are redefining how next-generation ingredients are developed and utilized. These scientific innovations are spearheading the **BioCosmetics** & **Postbiotics** revolution—ushering in a new era of safer, more sustainable, and highly effective products.

Our comprehensive BioCosmetics portfolio encompasses Bioactives, Enzymes, and Postbiotics, tailored for advanced personal care solutions. In addition, we offer a curated selection of Cosmetic Botanicals, ensuring an extensive and versatile product range for our clients. As a one-stop destination for innovative cosmetic ingredients, we are committed to delivering solutions that guarantee superior efficacy, avoid synthetic additives, uphold sustainability principles, and help safeguard biodiversity. BioCosmetics and Postbiotics check all the boxes of non-synthetic, clean, vegan, biodiverse and eco-friendly ingredients.

All our ingredients are supported by rigorous technical data and robust scientific research. At Meteoric Cosmeceuticals, we are dedicated to collaborating closely with our clients—offering creative, unconventional ingredient solutions—to help them build distinctive, competitive, and next-generation product lines.

Ta-da! Look what we've got..

BioCosmetics

BioCosmetics will offer powerful solutions to meet the ever-evolving needs of the beauty industry, from producing bioactive compounds to developing novel delivery systems, biotech will influence every part of the cosmetic value chain. Over the past 1 decade, BioCosmetic Ingredients have seen rapid growth and will continue to show increasing interest across the global markets due to their high efficacy, and strengths like sustainability, reducing waste and carbon emissions and preserving biodiversity.

Living the legacy of Meteoric Group into Biotech Ingredients, Meteoric Cosmeceuticals has developed a range of BioCosmetics which includes Cosmetic Bioactives and Enzymes.

Enzymes

- Bromelain 2400 GDU
- Superoxide Dismutase (SOD)

BioCosmetics

Bioactives

- Exosomes
- Glycolipids
- Squalene
- THC
- Ectoin
- Pro Xylane
- Vegan Collagen (6D, 315 and MSE)
- L- Glutathione Reduced
- Hyaluronic Acid (HMW, MMW, LMW, ULMW, DSHA, 8D, 4D, Oligo 3k to 5k, Oligo 5k to 10k – Cross Polymer, HA PDRN, HA Exosome)
- PQQ
- Phosphatidyl choline
- Phosphatidyl serine
- N-Acetyl Glucosamine
- Mushroom Beta Glucan

The Art of Science, The Science of Beauty

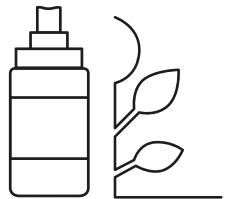

Postbiotics

The skin's well-being relies on a vibrant living ecosystem. Microorganisms on our skin don't just serve as a protective shield—they work together with our skin to create a unique, dynamic environment, known as the Skin Microbiome. Our skin microbiome, comprising trillions of microorganisms—demands next-generation cosmetic ingredients to fortify and support the skin barrier. The core microbiota, a distinct community residing on our skin, stabilizes by the age of three but can fluctuate in response to hormonal shifts, lifestyle habits, environmental factors, nutrition, and UV exposure. Modern living continues to influence these delicate microbial populations. Such imbalances in the skin's microbiome can be effectively addressed with Postbiotics—non-living byproducts derived from Probiotics.

While introducing live microorganisms to the skin is not advisable, Postbiotics offer a safe and scientifically validated alternative. Extensively proven for their skin benefits, Postbiotics help reinforce the skin barrier, boost hydration, regulate sebum production, enhance UV protection, reduce pigmentation and darkspots and provide anti-aging benefits.

Meteoric Cosmeceuticals' advanced Postbiotics range is designed to cultivate a balanced, resilient skin microbiome for optimal skin health and vitality.

Postbiotics

- Rice Ferment Filtrate - Japanese
- *Lacticasei bacillus rhamnosus* MBLRM6 300 B
- *Lactobacillus acidophilus* MBLAM3 300 B
- *Lactiplantibacillus plantarum* MBLPM27 400B
- *Bifidobacterium breve* MBBBRM 60 600B
- *Lactobacillus* Ferment Lysate
- *Sacchromyces* Ferment Filtrate

Where Innovation Meets Elegance

Cosmetic Botanicals

Botanicals harness the natural benefits found in plants. To create a botanical extract, various parts of the plant—such as roots, callus, flowers, bark, and leaves—are carefully processed using a specialized solvent. This process releases the plant's valuable compounds, which are then separated from any insoluble material. The resulting extract can be left as a liquid or turned into a powder, making it easy to blend into skincare or cosmetic products. When done properly, this method delivers pure, concentrated plant extracts that capture the essence and effectiveness of the original botanicals. As consumer demand for "clean" and sustainable beauty grows, cosmetic botanicals offer a compelling synergy of efficacy, safety, and ecological compatibility.

Meteoric Cosmeceutiical's Cosmetic Botanicals brings you proven and effective ingredients for skin and hair care.

Cosmetic Botanicals

Extracts

- Ashwagandha
- Turmeric
- Aloe vera
- Citrus
- Coffee
- Papaya
- Pomegranate
- Green Tea
- Rosemary

Legacy

Meteoric Cosmeceuticals is part of the Meteoric Biopharmaceuticals group, established in 2006, a globally recognized leader, in top-quality Enzymes, Probiotics, Bioactives, Formulations, and Animal Health Care. With a customer base of over 1000 worldwide, Meteoric is committed to excellence.
